Application/Control Number: 10/038,612

Art Unit: 1654

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-65, drawn to peptides and their methods of use, classified in class 514, subclass 12.
- II. Claims 66 and 67, drawn to antibodies and methods of making the antibodies, classified in class 530, subclass 388.26.

The inventions are distinct, each from the other because the peptides and the antibodies are materially different products having materially different sizes, structures, and uses.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. The sequence listing filed January 8, 2002 has been approved.
